| The MAILING DATE of this communication app<br>Period for Reply   | ears on the cover sheet with the c   | orrespondence address |  |  |  |  |
| A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1. MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).  Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). |  |                       |  |  |  |  |
| Status   |  |                       |  |  |  |  |
| 1) Responsive to communication(s) filed on 15 January 2004.  |  |                       |  |  |  |  |
| (2a) This action is <b>FINAL</b> . 2b) ⊠ This action is non-final.   |  |                       |  |  |  |  |

Application/Control Number: 10/758,354

Art Unit: 2855

## **DETAILED ACTION**

## Election/Restrictions

- Claims 1-9 are generic to a plurality of disclosed patentably distinct species comprising;
  - Species I. (claims 1-2 and 8) comprises. A pressure sensor having 
    "transducer means for measuring the fluid pressure by 
    characterizing the effects that the fluid molecules produce on 
    the motion of the structure."
  - Species II (claim 3) comprises a pressure sensor having "second transducer means for measuring the fluid pressure by characterizing the effects that the fluid molecules produce on the motion of the structure by converting the capacitance across the first and second electrodes into frequency by including in a tank circuit of an electronic oscillator".

Application/Control Number: 10/758,354

Art Unit: 2855

Species III (claims 4,6,7 and 9) comprises a pressure sensor having "second transducer means for measuring the fluid pressure by characterizing the effects that fluid molecules produce on the motion of the structure by optically measuring the distance between the first and second mirrors".

Page 3

Species IV (claim 5) comprises a pressure sensor having "second transducer means for tuning the frequency of the voltage applied across the first and second electrodes so as to be substantially twice the mechanical resonance frequency of the structure".

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

## Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andre J. Allen whose telephone number is 571-272-2174. The examiner can normally be reached on mon-fri 8:00-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Edward Lefkowitz can be reached on 571-272-2180. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
